

10 must-see innovations at

LUXLIVE 2014

LuxLive 2014 will feature an unprecedented number of world firsts and groundbreaking technologies. Here's our top 10 must-sees

1 THE WORLD'S ONLY DAYLIGHT-GENERATING SKYLIGHT

The sensational CoeLux is an artificial skylight like no other. It recreates daylight using optical technology that has been 10 years in the making. An absolute must-see at LuxLive.

IdeaWorks Stand D5

2 LOCATION TRACKING

This system lets standard LED luminaires broadcast a signal that is picked up by smartphones and can pinpoint people in a space. The data can be used to send targeted marketing information to those smartphones.

EldoLED Stand C21

3 LUMINOUS PAVING

Zero-energy illuminated pathways, cycleways and roads. That's the promise of glow-in-the-dark paving like Pro-Teq's Starpath, which absorbs daylight and emits light in the evening.

Tech Theatre 2, 11am, Thursday 20 November

4 BLADES OF LIGHT

iGuzzini's revolutionary Trick luminaire emits a blade of light inside a space. A completely new form factor, it uses special optics to spread the beam around 360 degrees.

iGuzzini Stand F24

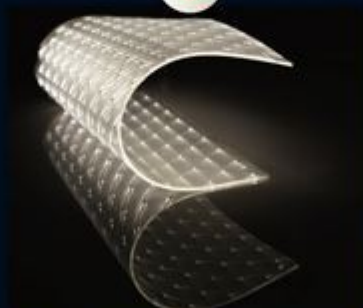

5 LI-FI - THE INTERNET OVER LIGHTING

High-speed wireless internet connectivity can now be delivered securely using standard LED lighting, as part of the visible light communication revolution. Try it for yourself at the show.

REVOLUTIONISE YOUR LIGHTING

6 FLEXIBLE LIGHT TILES

Light you can roll up like a newspaper. These thin, flexible LED light tiles have shedloads of applications in architecture, retail, shelf lighting and furniture. Ikea liked it so much they bought a stake in the company.

Design LED Stand H43

7 HUMAN-CENTRIC LIGHTING

Lighting that varies in tune with our daily biological rhythms in both brightness and colour can improve wellbeing and has applications in offices, residential and healthcare.

PhotonStar LED Stand F42

8 INTELLIGENT DIMMERS

They may look like ordinary wall dimmers but these next-generation products automatically detect the mix of lamps and control gear on the circuit and make it dim seamlessly.

Hamilton Litestat Stand B42

9 ULTRA HIGH-PERFORMANCE LAMPS

The firm founded by Nobel Prize winner Shuji Nakamura will be at LuxLive with the third generation of its full-spectrum MR16 lamps - powered by the world's most efficient LED.

Soraa Stand H41

10 TRANSPARENT OFFICE LUMINAIRES

LEDs have made possible a new generation of ultra-slim luminaires such as those that are transparent when unlit. The Trilux Lateralo Plus even has hidden power connections.
